

Life sales made easy with no need for face-to-face interaction

There's no better time than now to offer your clients the convenience of Accelewriting because it features:

eApplication and policy eDelivery

The eApplication can be completed over the telephone with eSignature.

No uncomfortable telephone interviews for your clients

You maintain control of your client relationship without having to hand the process over to a tele-interview.

No Paramed — a completely fluid-free process

While other carrier's accelerated underwriting processes may still be invasive, we work hard to avoid blood and urine, from Rated underwriting classes up to Preferred Plus.¹

Even if your client is a Standard underwriting class, instead of pivoting immediately to full underwriting, Sagicor will try to process your application with just an APS — keeping the process less intrusive to your client.

The opportunity to have a decision in minutes

With Sagicor, you have the opportunity to receive an underwriting decision within minutes at point of sale from Rated to Preferred Plus¹ underwriting classes, including Tobacco. Our competition can take days to do the same.
